

Addition to Artist's Statement:

2024 was a year of change, my pottery studio relocated to the restored dairy barn on my family century farm in northern Wisconsin, leaving my beloved Galena studio after over 20 years. The completion of a 40 cuft fiber updraft fiber kiln, "Mini Puff," construction of a larger spray booth, expanded studio work/display space and the installation of a solar system have made this studio a dream come true.
